Short description:

A simple spin toy that can be printed without supports

Description:

Since I enjoy making small designs by request... I am taking suggestions. This spin toy was suggested by Jimmy Gunawan via Facebook. Let me know what you would like me to design and I will share the files! Print the Top upside down and with a brim if you can. The angles should be such that it comes out nice without support. See if you can make the tip really precise because this will define how nice it spins!

If you can, please use the online documentation found at <http://www.youmagine.com/designs/top-spin-toy-for-jimmy-gunawan> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
